Response from our Parents

Our daughter has always been very inquisitive and curious, since her time at camp she has had a greater interest in STEAM and confidence in doing so.

"We send our daughter to Inspire because we believe in the mission. The program is unlike any other in the area and taught my child to become interested in science/math/learning. In addition, the social aspect provided my daughter the opportunity to meet new people and get used to being in new situations."

"Incredibly thoughtful and engaging weekly themes and activities to create a very fun and spirited learning environment. My daughter still talks about concepts and ideas she learned at camp and builds on them at home. The instructors are fantastic and inspiring role models. This kind of summer programming is more important than ever in today's cultural climate. Innovative and focused on bringing out the best in every individual girl and shaping young minds - a true gem of an organization that is building the future."

100% of our parents would recommend INSPIRE to your family, friends, neighbors and colleagues.
